EXAMINER'S ACTION

**Part III DETAILED ACTION**

1. The declaration filed on April 26, 1995 under 37 C.F.R. § 1.131 is sufficient to overcome a potential rejection of the claims based upon the Gunthorpe et al reference (PCT WO93/12439) which was cited by applicant on April 26, 1995.

***Claim Objections***

2. Claim 53 is objected to because of the following informalities: At line 9 "processors" should be singular and at line 13 of this claim "play" should be --played--. Appropriate correction is required.

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

***Claim Rejections - 35 USC § 102***

4. Claims 25-31 are rejected under 35 U.S.C. § 102(b) as being anticipated by Bonito et al U.S. Patent No. 5,095,430. Column 8 line 26 of Bonito clearly describes applicants apparatus for allowing golfers to perform bets.

5. The indication of allowability expressed during the interview for claim 54 is withdrawn due to the wording used in the amendment to claim 54. This claim is still anticipated by the Huston reference. Claim 54 should be amended to include the limitation that the display means will also be displaying data of

different locations for each hole based upon the sensed location of the portable golf computer.

6. Claims 54 is rejected under 35 U.S.C. § 102(e) as being anticipated by Huston et al. U.S. Patent No. 5,364,093. Huston stores multiple scenes of the golf course and the system displays one of these scenes in response to the golf cart computer's position.

***Claim Rejections - 35 USC § 103***

7. Claims 32-35 are rejected under 35 U.S.C. § 103 as being unpatentable over Bonito et al U.S. Patent No. 5,095,430. Bonito fails to describe applicants means for transmitting the golf game's data to the central computer (figures 5 and 17). Bonito uses a hardwired connection at the central computer at the location where the memory cartridge is inserted into the central computer. However, wireless transmission system were very well known at the time of applicants invention and it would have been a matter of design choice to transfer the contents of the memory cartridge by Bonito's direct connection method or applicant's wireless method. For this reason claims 32-35 would have been obvious to one of ordinary skill in the art at the time of applicant invention.

***Allowable Subject Matter***

8. Claims 1-24 and 36-52 are allowable over the prior art of record.

9. Claim 53 is objected to for a grammatical error, but would be allowable if amended to correct this very minor deficiency

***Additional Prior Art***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bergeron U.S. Patent No. 4,764,666 and Lucky U.S. Patent No. 5,043,889 all describe apparatuses for processing bets in golf games.
